

AUTOMATIC SCREEN PRINTER OPEN HOUSE AT PET ALL'S PHOENIX, ARIZONA SHOWROOM

Our Phoenix facility will host an open house this fall featuring the GID-S102 1-color automatic screen printer for plastic bottles and the Phoenix 10-155F extrusion blow molder.

The S102 will automate the screen printing process for oval and cylindrical containers. It includes infeed conveyor (option available to upgrade to an automatic unscramble), flame pre-treatment, 1-color screen printing head with all the adjustments, UV curing station and automatic discharge to bulk or a conveyor.

Tops speeds of 5000 parts per hour can be expected depending on the container's design. The screen printer can be integrated to a blow molding line for a complete turnkey system, all provided by Pet All Manufacturing.

Examples of containers printed on the S102:

Our screen printers are supported by our facilities in Toronto, Canada and Phoenix, Arizona. Sales, delivery, installation, start up, operator training, trouble shooting, spare parts and warranty service are available.
