

# PET ALL MANUFACTURING INC.

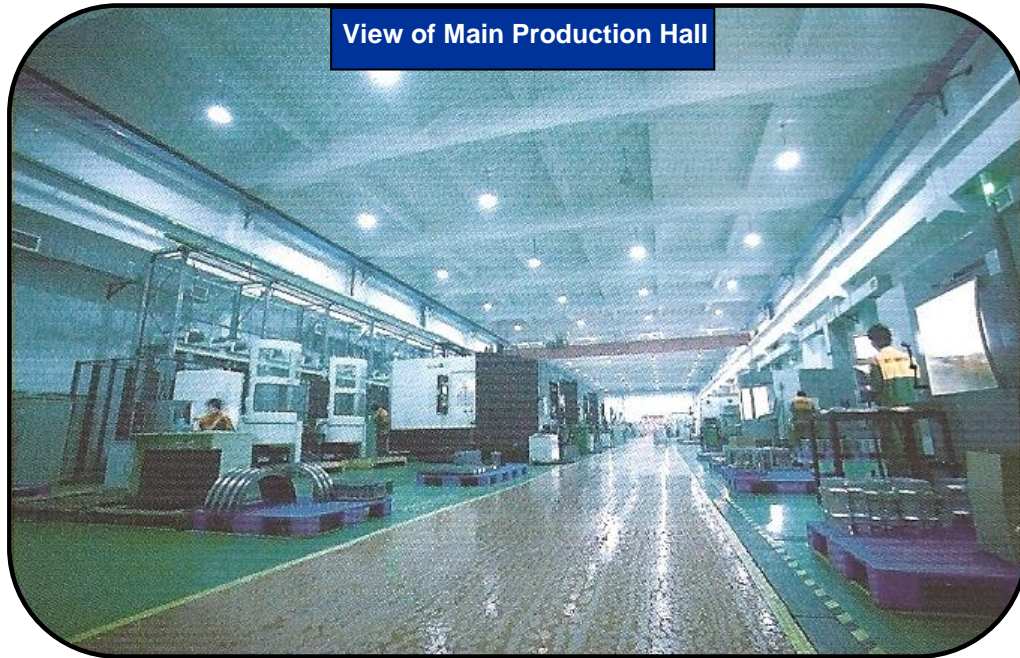

Leak Detectors, Preform and RHSB Machines

EBM, IBM, Accumulator Head Machines

## NEW IBM TOOLING FACILITY

**From January 1, 2013; Pet All Manufacturing / CanMold has opened its own TOOLING ENGINEERING CENTER in Hangzhou, PRC.**

The Center has the following for testing tools before release to the USA or other markets:

- 135 Ton IBM machinery
- 30 Ton IBM machinery

Our partners in the project are one of the largest tool manufacturing centers anywhere worldwide. Production equipment is world class, and the manufacturing environment unmatched. We already started delivering tooling from the center during November, and quality is as expected.

Pet All will in future only deliver tools from the OEM machine builders by special customer request (previous supplier of tools). All normal orders will be done at CANMOLD Asia, our new center.

Please see page 2 attached, for a partial list of production equipment of which there are multiples.

We look forward to supplying you IBM tooling in 2013 from this excellent facility.

Yours sincerely,

Mike Merrick
